# Corpus

- ▶ Subset of the tac corpus
- ▶ 268, 036 Documents, X sentences having a country and a number
- ▶ List of countries augmented manually by adding all possible synonyms (Dutch, Netherlands) and inflections (Ireland, Irish)

# Distant supervision process for numerical relation extraction

- ▶ Extract a country and number from a sentence, go to kb and check if there is a match.
- ▶ Can be creative during matching:
  - ▶ Distance based matching
  - ▶ Time based matching

# False Positives

Numbers are weak entities

- ▶ Vanilla numerical relation matching is bound to attract humongous amounts of false positives;
- ▶ Stems from the fact that numbers don't have an identity of their own.
- ▶ Consider **India** and **Mumbai** Vs. **India** and **19**
- ▶ **Mumbai** is a strong entity, **19** is a **weak** entity.

# False Positives

Numbers are weak entities

- ▶ Compare the number of sentences in which **India** and **Mumbai** appear together, vs the number of sentences in which **India** and **19** appear together.
- ▶ Just **19** can be appear with India in several contexts:
  - ▶ Internet user %
  - ▶ Billion dollars invested by a company
  - ▶ % of people below the poverty line
  - ▶ date (if we are not careful)
  - ▶ number of medals won by Indian athletes...
- ▶ Can we expect the situation to be even worse for certain types of numbers?
